DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on November 20, 2006 has been entered.
2. Amendment filed November 20, 2006 has been entered.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Applicant's arguments filed November 20, 2006, have been fully considered but they are not found persuasive.
5. The Declaration of Brian O' Dowd under 37 CFR 1.132 filed November 20, 2006 is insufficient to overcome the rejection of claims 14-34 based upon 35 USC 101 as set forth in the last Office action.

The Declaration of Brian O' Dowd provides post filing date references which indicate utility of GPR54 orphan receptor. However, the declaration fails to provide the nexus between the specification on paragraph 3 of the Declaration to the post filing date reference. This is necessary because at the time of the filing the GPR54 was an orphan receptor with no known function. The discovery of the function in the post filing date reference is after the filing of this application. A nexus between the specification as filed and the post filing date is necessary to provide utility for the receptor.

Claim Rejections - 35 USC § 101

6. Claims 14-34 remain rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility.

The reason for the rejection has been set forth in the previous office action.

Applicants argue that the Declaration of Brian O'Dowd under 35 USC 1.132 provides evidence of utility for the GPR54 protein. However, as discussed above, the utility requires the nexus between the specification and the post filing date references.

Claims 14-34 remain also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

7. No claims are allowed.
